Sorry this took me so long. Every time I sat down to read it another “emergency” seemed to pop up demanding my attention.

Overall it looked good –

You’ve received the list of all contaminants detected (although they are not driving the clean up like PCBs and lead), add the risks associated with those constituents if you think it’s pertinent to worker H and S. You’re also aware of the results of the asbestos assessment.

Please add my contact information Paige Delgado 469.371.2529 on the contact lists since Gary won’t always be there.

Also, please emphasize hygiene since the COCs we’re concerned with are associated with soil and digestion/inhalation is a major point of contamination to the workers. (handwashing, smoking, eating, etc.)

Please let me know if you have any questions/issues.

Thanks
